

BOLLARDS

type 80

type 90

DESIGNERS AND MANUFACTURERS OF
URBAN STREETWARE AND LIGHTPOLES

GOLDSPAR

These popular bollards are robust and durable, adding elegance to any environment.

Goldspar bollards can be designed to special order to match or complement the design of any application.

Bollards can be set in the ground, supplied with a base plate, or supplied with a removable spigot mounting system.

French

Type 80 – specifications

Code	H	D1	D2
80/9	900	70	150

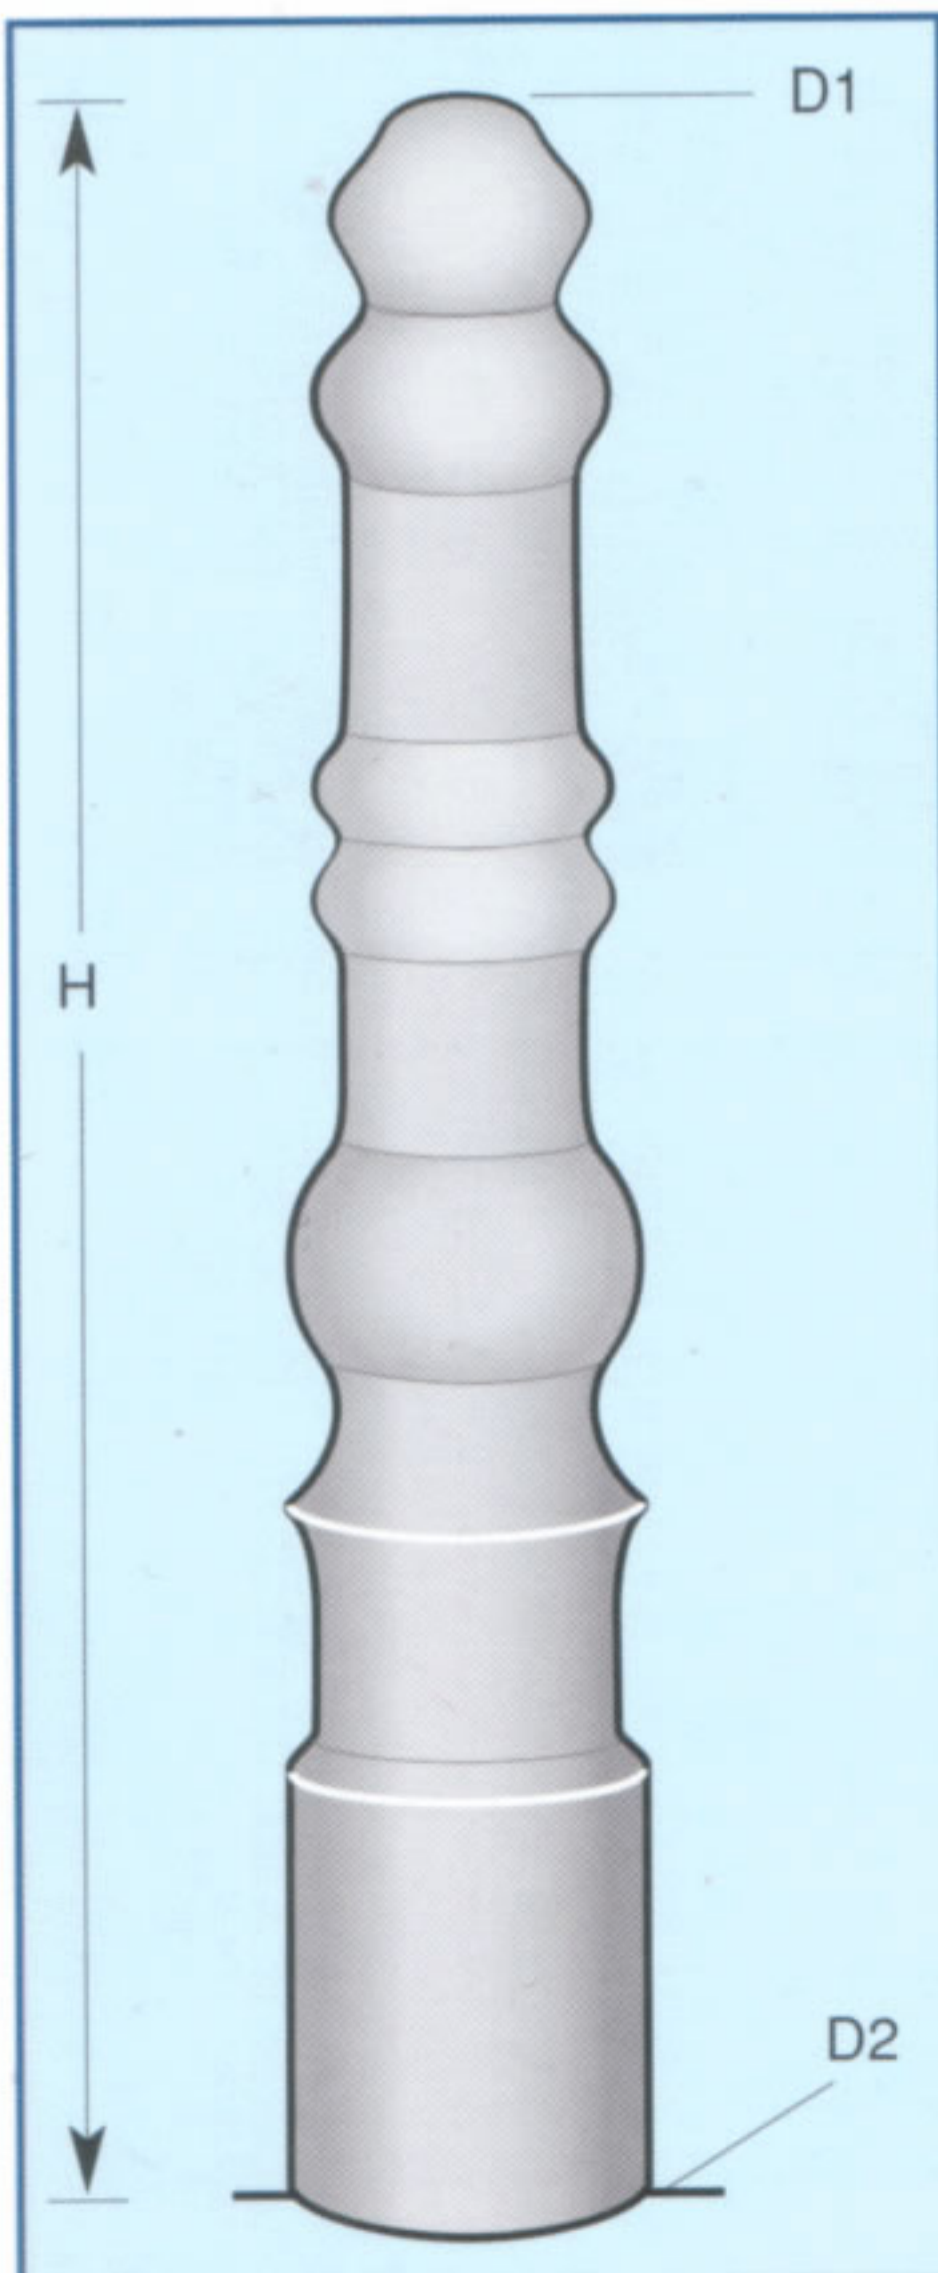

London

Type 90 – specifications

Code	H	D1	D2
90/9	900	70	135

Average depth for footing is 1/10th bollard height
(consult your structural engineer).
