

AUSTRALIANA

wall mounted flagpoles

Designed to enhance the look of public and corporate spaces, Australiana aluminium flagpoles are elegantly tapered using Goldspar's unique production processes.

Vertical or angle mounted, these wall-mounted flagpoles are designed for multiple installations on the external walls of shopping, sports and exhibition centres or public and corporate buildings.

Australiana tapered flagpoles range from 3 metres to 20 metres and are designed to withstand winds of up to 180 km/h (higher-load poles available to special order).

Specifications and fittings match those for the inground tapered flagpole range, but with appropriate wall brackets supplied in place of spigots.

Goldspar wall brackets are made from aluminium extrusions for strength and durability. Non-standard brackets can be designed and manufactured to special order.

Available in a durable white powder-coated finish or clear anodised finish. Special finishes to complement architectural design are available as optional extras.

Wall mounted flagpole – specifications

Code	H	D at base	E
W/4.5	3 - 6m	80	1000
W/6	4 - 7.5m	80	1500
